PERSONAL PROJECTS:

DevCon

- MERN stack. A social network for developers.
- Created developer-driven web app using JWT Web tokens for user authentication, ReactJS with clean, re-usable components.
- Back-end uses Express framework, Restful routing, API endpoints, and MongoDB.

GreenSpot

- MERN stack app consuming third-party API (Google Maps and Geolocation API). Locates vegan vendors in a specified vicinity.
- React-frontend with maintainable components, Express back-end.
- Worked in a team of 3 developers in an AGILE environment, used Git version control; resolved merge conflicts

Film Scout

- Web app that serves as the middleman agency between videographers and filming locations.
- React-Frontend and Google Firestore as the server
- Worked with UI/UX designers to bring a mock-up to life.

Let's Play

- Tech Stack: React, Bootstrap, Python, PostgreSQL, and Flask Responsive CRUD app that connects board game enthusiast together.
- Worked in a team of 2 in an AGILE environment

• Consumes a single third-party API (BoardGameGeek's).

Landlordly

• A MEN stack CRUD web app managing rental property for landlords.

• Practiced RESTful routing and exposing API endpoints, while populating data with MongoDB.

• Set up payment systems with Paypal.

• Used Node.js' environment to produce algorithms, responsive routes, and dynamic views.

Fluffy Egg Bun

• Using Wordpress Content Management System, created a small informational webpage selling Korean fluffy egg buns on a cart.
